NORTH DAKOTA

Lignite is available from BNSF-served surface mines in North Dakota. This lignite field is part of the Great Plains coal area. Heat values of the deposits in this area range from 6,500 to 7,000 BTU/lb. The lignite is primarily burned by local power plants, but can be used by any properly designed stokers, coal-fired units and cyclone furnaces.

Beulah Mine - Westmoreland Coal Co.

Type of Mine	Lignite - Surface	
Loading Station	Beulah Mine, North Dakota (Mercer County)	
	2 miles south of Beulah, North Dakota	
Marketing Contact	Westmoreland Coal Sales Company	(303) 922-6463
	sales@westmoreland.com	
Coal Specifications	Proximate Analysis (as received)	Typical
	Btu/lb.	7,000
	Sulfur	0.6%
	Ash	6.5%
	Sodium as % of Ash	6.0%
Recoverable Reserves	43 million tons	
Annual Production	201744 Million tons	
	201688 Million tons	
	2015 - 2.9 Million tons	
Storage Capacity	50,000 tons	
Loading & Weighing	Tipple with chutes to handle 1,600 tons pe	er
Track Configuration	Capable of loading unit trains	
	Beulah Mine supplies lignite to electric
